EXPERIENCE

Carolina Code School, Greenville, SC—Student

JAN 2021- APRIL 2021

Spent 12 weeks in an intensive, full-stack software development bootcamp. In addition to writing code, we focused on collaboration, pair programming, clean code, Agile methodologies, documentation, and best practices.

City of Greenville—Parking Services *Event staff*

JUNE 2001 - MARCH 2018

Provided ticket holders with parking & directions upon arrival.

Meals on Wheels, Greenville, SC — *Volunteer*

MARCH 2012 - MARCH 2020

Delivered meals.

EDUCATION

Self-Taught Software Developer

I began coding as a hobby in 2001 and haven't stopped since! I used books, Udemy courses, and other online courses to teach myself the basics of web development. I then moved on to finding my niche in C#/.NET while continuing to learn HTML, CSS, and JavaScript. I decided to enroll at Carolina Code School to round out my self-taught education in hopes of beginning a career in the field.

Greenville Technical College — *Associate of Science*

2016-2020

This was a science degree mostly focusing on mathematics.
